Velvet Velour Curtains

Available as standard or Heavy Velvet Velour with a wide variety of colours and high quality appearance, Velvet Velour provides a great alternative to our Wool Serge range

Velvet Velour Curtains

Available as standard or Heavy Velvet Velour with a wide variety of colours and high quality appearance, Velvet Velour provides a great alternative to our Wool Serge range. Perfect for those applications demanding a high standard of aesthetic appearance.

We can manufacture curtains with a variety of headings and to various degrees of fullness to suit the application. We can also supply fabric in standard 120cm width, either by the linear metre or in complete rolls.

Fabric Type	Weight	Colour Range
Velvet Velour	395g/m ²	10 Colours
Heavy Velvet Velour	520g/m ²	33 Colours

All of our Velvet Velour Curtains meet the requirements of BS5867: Part 2: B which is the British Standard for flame retardant fabrics used for the manufacture of curtains or drapes.

The Heavy Velvet Velour fabric is chemically treated with a water based solution and as a consequence is a NDFR (Non Durably Flame Retardant) fabric that, if wetted, must be retreated.

Sound Absorption Coefficients, tested in accordance with BS EN ISO 354: 2003:

Frequency (Hz)	125	250	500	1k	2k	4k
Velvet Velour	0.07	0.14	0.27	0.32	0.36	0.40
Heavy Velvet Velour	0.10	0.19	0.37	0.44	0.49	0.54

(The above figures are based on curtains with 50% fullness spaced 100mm from a wall.)

Sound Reduction Index (SRI):

Frequency (Hz)	63	125	250	500	1k	2k	4k	8k
Velvet Velour	1.6	1.0	1.9	3.4	4.3	4.8	5.4	6.4
Heavy Velvet Velour	2.2	1.4	2.6	4.6	5.9	6.5	7.3	8.7
